

Ciclos Hamiltonianos: Uso dos Teoremas

Indique quais grafos satisfazem Dirac, Ore e Bondy & Chvátal

Recapitulando...

- ▶ Dirac: $n \geq 3$ e $d(x) \geq n/2 \forall x \in V$;
- ▶ Ore: $d(u) + d(v) \geq n \forall \{u, v\} \notin A$;
- ▶ Bondy & Chvátal: $\Phi(G) = K_n$.
